DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Amano (PN 5,265,115).

Figure 2 illustrates a solid-state laser system having a laser diode (18), a laser crystal (10), a wavelength conversion crystal (12) within a resonant cavity formed by mirrors (16) and (17), as described in columns 3 and 4. Column 9 lines 50-68 disclose and teach using an Nd:YVO₄ for the laser crystal and an LBO for the wavelength conversion crystal.

Figure 2 illustrates a similar structural arrangement using the similar elements within the resonant cavity; as such the axial modes, output power and RMS noise will be inherent to the laser system.
